

Task 1

The sky is dark and heavy with thick clouds, and Lee **(1)** that the temperature is dropping rapidly. He says to his wife, “Look at those clouds—it **(2)** tonight.”

Feeling cold, Lee decides to make a cup of hot coffee. While he **(3)** the coffee, his wife warns him, “If you drink that now, you **(4)** able to sleep all night.” Lee replies, “That’s fine. I **(5)** any important meetings tomorrow morning, so I can sleep in.”

Before going to bed, Lee **(6)** the train timetable on his phone. He notices that the express train **(7)** at 10 a.m. every Saturday. Since they have a camping trip this weekend, Lee tells his wife, “After work tomorrow, I **(8)** to the supermarket to shop. I **(9)** some steaks for our BBQ.”

His wife smiles and replies, “Great, then I **(10)** the rest of the luggage at home.”

(snow) this afternoon.

Change the attention task from 1 to 2 attention tasks, use more complicated words like 'dance', 'Seague'. Etc.

change the items# 11 to: 'In the autumn, a weather presenter: Good news for all you skiers out there...
...we {SEE} a lot of snow in the next few months.'; items# 14 to Q: What do you think will happen in the
national elections in two years? A: The incumbent has a strong base, but you never know.../...the
challenger {WIN}. items#17 to [Q: Are you going on holiday this summer? A: Yes, in a couple of months.
My boyfriend doesn't want to, but...] ...we {TRAVEL} to Georgia.'

Part 1 — Complete the Stories

You will read four short stories. Some words are missing — please fill each gap with the word or phrase that feels most natural to you, as if you were talking to a close friend. There are no right or wrong answers.

How it works

- 1 You will read short stories with some words missing. The missing words appear as **blue hints inside the gaps**.
- 2 Click on a blue hint to open the gap, then type **the word or short phrase that feels most natural to you**.
- 3 If you click away without typing anything, the blue hint will reappear so you can come back to it later.

TRY IT YOURSELF

It was a rainy morning. Tom LOOK out the window and noticed the streets were completely wet.

He grabbed his coat and thought, "I NEED an umbrella today.

Otherwise I GET soaked on my way to work."

Tips

- ✓ Write whatever feels most natural — there are no right or wrong answers.
- ✓ Imagine you are telling the story to a close friend.
- ✓ One word or a short phrase is enough for each gap.

Let's begin →

260305

Updates:

1. Change some words into bold.

Please help us to fix:

1. Gap after the blue hints.
2. When you type more words into it, some words are hidden.
3. Tip 3: "One word or a short phrase is enough for each gap." we want to see wheather they will use some uncertainty modality like "might need", but if we told them like tip 3, they may just fill in with 1 word.

Example: I typed "really really need, but some apart disappeared."

TRY IT YOURSELF

It was a rainy morning. Tom LOOK out the window and noticed the streets were completely wet.

He grabbed his coat and thought, "I really really need an umbrella today. Otherwise I GET soaked on my way to work."

Part 1 — Complete the Stories

You will read four short stories. Some words are missing — please fill each gap with the word or phrase that feels most natural to you, as if you were talking to a close friend. There are no right or wrong answers.

Part 2

You are now moving on to the second part of the study.

- 1 You will see short dialogue scenarios. Each one has a gap where a word or phrase is missing. **The missing word appears as a blue hint.**
- 2 Click the blue hint to open the gap, then **type what feels most natural to you.** Use the hint verb as a guide.
- 3 **Where a certainty percentage is shown, imagine you are exactly that certain** and write what you would naturally say.

TRY IT YOURSELF

Weekend Plans

Q: What are you doing this weekend?

A: I'm not sure yet, but I think I visit my parents on Saturday.

And on Sunday, the weather looks nice, so we go hiking.

Please help us to fix:

260305

1. Part1 has title, but part 2 doesn't have the title, consider add the title "Complete the conversations"?
2. Same, Tip 3: "One word or a short phrase is enough for each gap." we want to see wheather they will use some uncertainty modality like "might need", but if we told them like tip 3, they may just fill in with 1 word.
3. the gap seems good here. But the overfill still exists.

1 / 10

Retail Prices

Salesman to customer: I'd come back tomorrow. New stock is arriving soon...

...the price on these *drop*.

2 / 10

Stock Markets

40% Likely

Q: How do you expect the stock markets to perform tomorrow?

A: It is unclear...

...they *rise*.

Please help us to fix:

1. the gap seems bad again.

Updated:

1. Should be A to B:

3 / 10

Financial Markets

50% Likely

A: I wouldn't invest right now. Conditions are unstable...

...the market *crash* tomorrow.

Please help us to fix:

1. I think this direction is very unclear, because some context is to finish the sentence as you are a weather reporter,
 - ⇒ This direction: “Please complete the sentence as though you were speaking to a close friend.”
 - ⇒ This direction to change to “as though you were speaking on that person’s position.”
 - ⇒ For example, salesman to customer: all the sentences including the target sentence are the salesman’s words, not a close friend.

2. Because of the direction is badbad, so I think maybe we can delete the line (red arrow) between the context and the target sentence, what do you thin 🗨️

Retail Prices

Salesman to customer: I'd come back tomorrow. New stock is arriving soon...

...the price on these drop.

2 / 10

Stock Markets

40% Likely

Q: How do you expect the stock markets to perform tomorrow?

A: It is unclear...

...they rise.

Concert Date

50% Likely

Q: When is the concert?

A: I think...

...they *play* tomorrow.

#item 23

Please help us to fix:

260305

1. We should delete “I think” which was claude added this, look through all the questionnaire in the previous study, they didn’t use the “I think” in the target sentence at all.

Thesis Defense

60% Likely

Student: When exactly do I defend?**Supervisor:** I'm fairly confident it has been set......your viva *be* in three months.

Updated: #24 to previous study.

Thesis Defense

60% Likely

Student to supervisor: So when do I defend?**Supervisor:** Let me check......your viva *be* in three months.

Please help us to fix:

About the attention tasks:

Should we add the words into the instruction? (see the blue arrow:)

=> [This is an attention check. Please simply enter the word for this question:] to [This is an attention check. Please simply enter the word **'run'** for this question:]

7 / 9

Office Relocation

A: Have you heard anything about the office moving to the new building?

B: Yes, management sent an email about it last week...

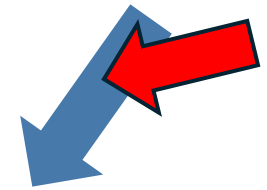

This is an attention check. Please simply enter the word for this question:

run

Please help us to fix:

1. Should we change this title, from part2 to part, I don't know, part 2-1?
2. And I think the UI is a bit messy, can we improve the UI like this? (orange arrow?)

This good but the color is too ugly tbh

Part 2: Certainty Ratings

You will be asked to indicate how much certainty each statement expresses in YOUR eyes. For each sentence, indicate how much certainty YOU would be expressing if you said it (0 = Uncertain, 100 = Certain).

It is going to rain next week.

0 (Uncertain)

← click the bar to respond →

100 (Certain)

It will rain next week.

0 (Uncertain)

← click the bar to respond →

100 (Certain)

I think it will rain next week.

0 (Uncertain)

← click the bar to respond →

100 (Certain)

It is going to rain next week. 56

0 (Uncertain)

100 (Certain)

(uncertain) tag a bit higher, and also the click the bar to respond
Light blue background interval,
Uhhh, see the pic please,
But remain that click that slipper and the “click the bar to respond will disappear” UI, that is very good, but if you can change the button's color I would like a more beautiful deep blue, I strongly think my arrow color is beautiful, (see my red arrow.)

Part 3: Decision Making

In this final part, you will make a series of choices involving potential gains and losses.

Bonus payment: You will have a chance to earn a bonus payment from completing the task in this part. Specifically, after the study is completed, 1 in 10 participants will be randomly selected to receive their task bonus as an **Amazon gift card**. Your choices below determine how large that bonus could be, so please decide as if every choice is real.

How it works: You will start with a bonus balance of **\$10.00**. You will then choose between a lottery and a safe option across several rounds. At the end, **one of your choices will be picked at random and played out for real.**

The outcome will be revealed to you immediately on the next screen. If you chose the safe option on that round, you simply keep your \$10.00. If you chose the lottery, a coin flip decides whether you win more or lose some of your balance.

PAYMENT

You start with \$10.00. One of your choices will be played out for real. 1 in 10 participants will be randomly selected to receive their bonus as an Amazon gift card.

Please help us to fix:

1. Maybe not the amazon gift card, bonus need to be distributed through the cloudresearch platform.
2. The instruction needs to be improved, this version is too long and pointless?

Part 3: Decision Making

In this final part, you will make a series of choices involving potential gains and losses.

Bonus payment: You will have a chance to earn a bonus payment from completing the task in this part. Specifically, after the study is completed, 1 in 10 participants will be randomly selected to receive their task bonus as an **Amazon gift card**. Your choices below determine how large that bonus could be, so please decide as if every choice is real.

How it works: You will start with a bonus balance of **\$10.00**. You will then choose between a lottery and a safe option across several rounds. At the end, **one of your choices will be picked at random and played out for real**. **The outcome will be revealed to you immediately on the next screen.** If you chose the safe option on that round, you simply keep your \$10.00. If you chose the lottery, a coin flip decides whether you win more or lose some of your balance.

PAYMENT

You start with \$10.00. One of your choices will be played out for real. 1 in 10 participants will be randomly selected to receive their bonus as an Amazon gift card.

Next →

在开始回答这个问卷之前，你会得到10美金作为初始奖励金额，之后你需要在安全选项A（保留你的初始奖励10美金）和彩票选项B（50%概率得到额外的5美金，或者50%概率损失一定的金额）之间进行连续的五轮决定。

注意，每一轮设置的损失金额都不一样，请慎重选择。我们会随机从五轮决定中选择一次，根据硬币是正面还是背面决定你的输赢情况，最终奖励金额会根据你的选择发生变动。我们会通过cloudresearch从完成本次研究的参与者中抽取10%的人发放最终奖励金额。

I rewrote this part's instructions, the left part will do that tmr,

Why we use 10\$ (10% (choose 1 participants out of 10)) instead of 5\$ (choose 1 out of 5?) 20% sounds more adorable.

Part 3: Lottery Decisions

You will now make a series of choices between a **lottery** and a **safe option** (keeping your bonus as-is). The lottery always gives you a 50% chance to **win \$5.00**. The potential loss changes with each choice. Your task is to find the loss amount where the lottery and the safe option feel *equally appealing* to you. **Remember, the outcome of this task will be revealed to you immediately after you submit your decision.**

How it works: There are no right or wrong answers — we are simply trying to find the loss amount that makes the lottery and the safe option feel equally appealing for you personally.

Comparison 1 of 5

Your task bonus starts at **\$10.00**. The amounts shown below reflect potential changes to this bonus.

A

Safe Option

Keep your **\$10.00** (no change)

vs

B

Lottery

50% Win \$5.00

(\$10.00 + \$5.00 = \$15.00)

50% Lose \$5.25

(\$10.00 - \$5.25 = \$4.75)

Which would you prefer?

Take the Safe Option

Take the Lottery

260306

你现在可以在下方看到初始奖励金额为10美金，你需要需要在安全选项A（保留你的初始奖励10美金）和彩票选项B（50%概率得到额外的5美金，或者50%概率损失一定的金额）之间进行连续的五轮决定。注意，每一轮设置的损失金额都不一样，请慎重选择。我们会随机从五轮决定中选择一次，根据硬币是正面还是背面决定你的输赢情况。没有正确或者错误的答案

Your task bonus starts at **\$10.00**. The amounts shown below reflect potential changes to this bonus.

Comparison 1 of 5

I think this page is a bit messy, but I can't tell where is messy and how to fix it, so maybe you can think a bit more and we can discuss.

B Lottery

50% Win \$5.00

50% Lose \$5.25

\$10.00+\$5.00 = \$15.00

\$10.00 - \$5.25 = \$4.75

You will now make a series of hypothetical choices between two payment options. One option pays a **smaller amount sooner**; the other pays a **larger amount later**. There are no right or wrong answers — we simply want to know your genuine preference. *These choices are not paid out. Please imagine the situations as realistically as possible.*

How it works: Each row offers the same sooner amount but a higher later amount. Once you prefer the sooner option on a row, you will prefer it on all rows above too — click once to set your switch point and the table updates automatically.

Each row: **\$50.00 in 2 weeks** (Option A) or a larger amount **in 6 weeks** (Option B).

#	OPTION A — SOONER	OPTION B — LATER
1	\$50.00 in 2 weeks	\$50.00 in 6 weeks
2	\$50.00 in 2 weeks	\$54.00 in 6 weeks
3	\$50.00 in 2 weeks	\$58.50 in 6 weeks
4	\$50.00 in 2 weeks	\$62.50 in 6 weeks
5	\$50.00 in 2 weeks	\$66.50 in 6 weeks
6	\$50.00 in 2 weeks	\$75.00 in 6 weeks
7	\$50.00 in 2 weeks	\$100.00 in 6 weeks

Continue to next horizon →

The words are too small, tbh I can’t see well.

260306
